KATHERINE LI

Grandville, MI | kl4370@nyu.edu

EDUCATION

New York University, Tandon School of Engineering May 2026

Bachelor of Science, Integrated Design and Media

Minors: Science, Technology, and Society; Technology, Management and Design

EXPERIENCE

Manufactured, *Design & Fabrication Intern*, Brooklyn, NY May–July 2026

- Adapted supplied GE Vernova and AirJoule models for 3D printing with guidance from the team engineer, splitting parts, repairing geometry, reinforcing fragile features, and refining print orientation and supports.
- Printed and bonded multipart exhibition models prepared for shipment to the 2026 Aspen Ideas Festival. Measured areas with print defects and designed fitted cover pieces in Autodesk Fusion to improve the finished surfaces.
- Developed AirJoule logo-placement mockups and embedded NFC tags linking the physical model to the company website.
- Designed Fusion mounts, tube-routing brackets, and coaster-input parts for the P4UL installation prototype. Revised and reprinted components to resolve collisions, add clearance, and fit the actual coasters.
- Translated an AI-generated visual direction into production-ready P4UL facade artwork in Illustrator, rebuilding vector elements and incorporating sourced assets; assisted with mounting and alignment of the printed panels.
- Fabricated stainless-steel brackets after validating fit with revised paper templates; wired, labeled, and tested servos for prototype movement.

NYU IDM Department, *Technical Assistant*, New York, NY September–December 2024

- Maintained computer-lab software and applications, created departmental graphics, and supported student-space redesign.
- Supported IDM Showcase planning, student display setup, and event-space safety.

SELECTED PROJECTS

Cordify | Senior Project Spring 2026

- Modeled and 3D printed cable-retraction prototypes in Fusion, testing spring force, roller grip, and ratchet mechanisms. Demonstrated independent pull and return with two opposing badge reels and a magnetic docking hub.

Small Bitty Tech Items Organizer | Individual Project Fall 2025

- Developed a five-slot organizer for USB receivers and storage cards through cardboard and 3D-printed iterations. Compared sourced click mechanisms and used feedback to refine labels, footprint, and mounting; presented the prototype at a showcase.

Building Blocks of a PC | Individual Project Fall 2024

- Created an educational PC assembly prototype using component measurements, cardboard mockups, and laser-cut plywood. Added magnetic attachments and simulated cables for visitors to assemble at a showcase.

LEADERSHIP

Alpha Omega Epsilon, Beta Sigma Chapter, *President* May 2025–May 2026

- Led executive-board coordination, chapter programming, and recruitment planning; represented the chapter in communications with national leadership and external partners.

Chapter Leadership Positions September 2023–May 2026

Professional Chairman | *Fundraising Chairman* | *Social Chairman* | *Historian Chairman*
Membership Educator | *Risk Management* | *Merchandising Chairman*

- Organized 20+ social, professional, and fundraising events, including industry panels, guest speakers, and networking events; coordinated schedules, budgets, safety planning, and outreach.
- Supported fundraising for chapter programming and national-convention travel; mentored and onboarded new members through the membership education program.

SKILLS

CAD and design: Autodesk Fusion, Adobe Illustrator, Adobe Photoshop; introductory Rhino and Blender

Fabrication: FDM 3D printing and slicing, laser cutting and engraving, prototype assembly, drill press, band saw, belt sanding, paper-template fitting, basic servo wiring and testing
